

Checklist:

Battery Risk & Value

For Owners, PTOs & Insurers

Battery Risk Checklist

1. VERIFY WARRANTY:

Review coverage
period, exclusions, and
threshold conditions
before signing.

2. PLAN REPLACEMENT:

Plan for 10-20% of the
batteries to need
replacement before the
warranty expires.

3. GET NEUTRAL DATA:

Use independent
battery monitoring,
not just OEM reports.

4. PLAN FOR RESALE:

Secure battery
health records to
support resale and
warranty claims.

5. COMPARE OEM's:

**Benchmark failure risks
across all bus types
and OEMs.**

6. REDUCE PREMIUMS:

Secure better
insurance terms using
independent analytics
to prove risk levels.

7. CHECK REGULATIONS:

Meet EU rules for
safety, recycle-ability,
and battery passport.

8. BRIEF STAKEHOLDERS:

Use battery diagnostics
to support discussions
with banks, insurers,
and investors.

8. BRIEF STAKEHOLDERS:

Use battery analytics
to support discussions
with banks, insurers,
and investors.
