

SQUEEZE IT!

Why 10% SOC isn't always 10%.

DRIED UP & GONE
Degradation

STUCK, BUT SHAKEABLE
SoC Mistake & Imbalance

BLOCKED & CLOGGED
Faulty Racks & Components

THE FINAL DROP
Available Energy (AvEn):
What you really get!

**UNLOCK €500K REVENUE
POTENTIAL OF YOUR BESS!**

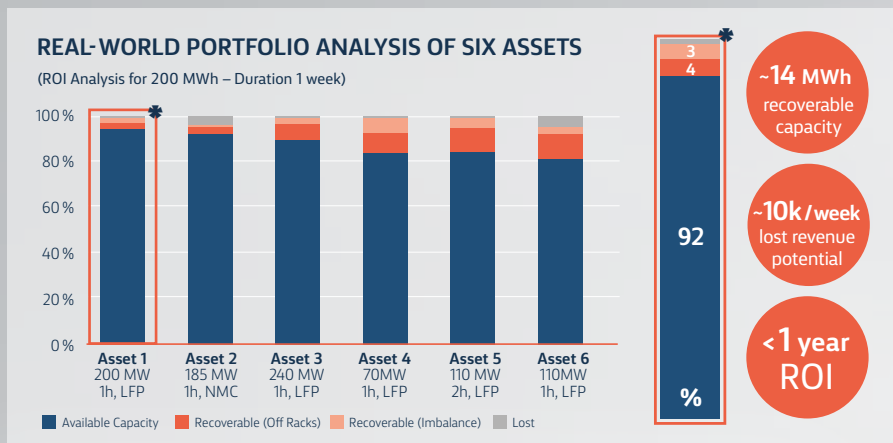

Where Did Your Capacity Go?

Everyone knows the ketchup bottle in the fridge – it seems full until you realize: 'Oops!'

The same happens with Li-ion batteries if they are not well managed: capacity gets lost, trapped or hidden. Our AvEn reveals this hidden potential so you never have to choose between underselling or overpromising again.

REVENUE LEAKAGE: THE HIDDEN GAP

UNLOCK UP TO €500K TRAPPED REVENUE**

- **Market-Required Signals:** High-frequency precision for your MWh dispatch.
- **Recover Energy:** Physics-based data to avoid high-cost buy-backs.
- **Market-Safety:** Detect 5 – 10% capacity loss from drift and offline racks.

** Based on 200 MW LFP BESS assessment; annualized potential.
