

Permanent Employment, Full Time or Part Time (f/m/d) Information Security & Quality Management Officer

Dresden / remote, from Mail 2022

Do you already have some experience in the field of information security and quality management? Do you enjoy sharpening structures and defining processes in a growing team? You enthusiastically demonstrate compliance with guidelines and thus motivate your environment to do the same?

If you can answer "yes" to most of these questions, get to know our team and join us as an information security and quality management officer!

Our Mission

We make the wear of the most expensive vehicle wear part, the battery, transparent. By unlocking valuable information in the field data that continuously accumulates during daily system operation, we enable our customers to develop more economical battery systems, reduce operational risks and establish after-use concepts (2nd-use).

We are an experienced team of engineers, battery experts and software developers and, as a spin-off of the Fraunhofer Institute for Transportation and Infrastructure Systems IVI, we work with state-of-the-art technology for a higher goal - more on www.volytica.com

Your tasks

- ☐ Development and implementation company-wide security and quality guidelines
- ☐ Creation of security concepts and work instructions
- ☐ Ensuring the effectiveness of information security management system (ISMS)
- ☐ Maintaining up to date written documentation and policies related to the organization's business activities
- ☐ Creation and maintenance of compliance resource library for staff members to reference when they have questions
- ☐ Accompaniment of internal and external audits according to ISO27001 and ISO9001
- ☐ Continuous development of business processes and quality standards to achieve and maintain external certifications

Your profile

- ☐ Degree in business administration, computer science, business informatics or equivalent practical experience
- ☐ Experience in information security and quality management
- ☐ Quick comprehension and structured thinking
- ☐ High quality standards and reliability
- ☐ Very good German and/or English skills

Why you should join

- ☐ At vdx you are part of a dynamic and ambitious team of juniors and seniors that works together on the technology for tomorrow
- ☐ Modern cloud technologies, electromobility and lithium-ion batteries, IOT, IAC and Industry 4.0: these are no marketing platitudes for us
- ☐ Your strengths and interests determine your development potential - we place great value on individual personality and skill development
- ☐ In the center of Dresden we offer you a workplace with a pleasant, modern atmosphere - and we subsidize your mobility!
- ☐ Flexible work scheduling - we take your individual situation into consideration and make it possible to work in a family-friendly manner. This includes optional home office and remote work
