

Battery Planning Checklist for PTO's:

How to Prepare for the 7%?

1. EXPECT IT:

**Assume 7% of your
fleet will show issues
at any time.**

2. MONITOR:

Go beyond BMS & use
independent analytics
like volytica's
vdx sentry.

3. PLAN AHEAD:

Reflect realistic
lifespans
in contracts.

4. SET THRESHOLDS:

Use trend-based
alerts or
contract-based
thresholds,
not just alarms.

5. BENCHMARK:

Use independent analytics to compare across fleets, OEMs and use cases.
